WORK EXPERIENCES

Niji Sushi Store, Keene, NH

June 2024 - Present

Operations Assistant

- Coordinated employee schedules, managed inventory levels, and maintained financial records to ensure smooth and efficient operations.
- Operated kitchen machinery and provided customer service enhancing overall customer satisfaction and loyalty.

Serene Villa, Kalaw, Myanmar

May 2023 - September 2023

Client Services Assistant

- Managed and created social media updates and responded to customer inquiries, ensuring effective communication.
- Organized bookings and accommodations, and handled maintenance schedules to ensure guest satisfaction.

Shwe Thone LTD, Yangon, Myanmar

June 2022 - August 2022

Property Management Intern

- Contributed the management team by organizing property viewings, maintained records of client interactions, and updated property inventories.
- Ensured up-to-date information to attract potential clients, and participated in basic marketing activities.

PROJECTS

Threads App

June 2024

Individual Developer | Independent Project

TypeScript | Next.js | MongoDB | CSS3

- Designed and implemented a thread creation feature using TypeScript and React Hook Form, enabling users to create new discussion threads and manage profiles with secure form validation and submission.
- Developed a dynamic and responsive user interface with Next.js, integrating server-side rendering for efficient data fetching and real-time thread updates, resulting in a smooth and interactive user experience.
- Github:** <https://github.com/arkthekid/threads.git>

Tic-Tac-Toe Game

June 2024

Individual Developer | Independent Project

Python | PyQt5

- Programmed a tic-tac-toe game using Python that allows the user to play against another player, an easy bot that randomizes moves, and a hard bot that uses the minimax algorithm to find the optimal move.
- Github:** <https://github.com/arkthekid/tic-tac-toe.git>

Weather App

June 2024

Individual Developer | Independent Project

JavaScript | HTML5 | CSS3

- Programmed a Weather app using JavaScript to fetch and display current weather data based on user input, and designed a responsive user interface with HTML5 and CSS3.
- Github:** <https://github.com/arkthekid/weather-app.git>
